SOFT SKILLS

- Mentoring & code review
- Problem solving under pressure
- Deadline-driven mindset
- Cross-functional collaboration
- Self-managed remote worker

PROFILE

Full Stack & Mobile Developer with 4+ years building production-ready applications across healthcare, logistics, and edtech. Proficient in React, Next.js, Flutter, Node.js, TypeScript and GraphQL. Experienced mentor who has guided 20+ junior developers, led architecture decisions, and shipped complex features end-to-end in agile environments. Passionate about clean code, scalable systems, and meaningful user experiences. Available for remote work globally.

WORK EXPERIENCE

Full Stack Developer • Utomata

Sep 2023 – Present

- Built and deployed a cross-platform Flutter (Dart) mobile app for iOS and Android, handling architecture, API integration, and state management end-to-end.
- Developed and maintained the company website with Next.js and TypeScript, improving load performance and search engine visibility.
- Collaborated with product and design teams in 2-week Agile sprints, consistently delivering features on schedule.

Mobile Developer • OpenHelp

Sep 2023 – Present

- Developed a Flutter mobile app from scratch enabling users to access support services on iOS and Android.
- Integrated REST APIs, implemented provider-based state management, and ensured smooth UX across devices.

Full Stack Dev Mentor • Numen Academy

Mar 2022 – Dec 2024

- Designed and built a full-featured student management platform including login/auth, interactive calendar, internal real-time chat, push notifications, and on-demand recorded classes.
- Mentored 20+ junior developers in React, Node.js, and API best practices through weekly sessions and code reviews.
- Led technical architecture decisions to ensure scalability, maintainability, and consistent code quality across the team.

Full Stack Developer • Ivoy

Dec 2021 – Jun 2023

- Developed and maintained 3+ responsive web applications using Strapi CMS, Google Cloud services, and geolocation APIs including Google Maps integration for real-time delivery tracking.
- Participated in cross-functional Agile/Scrum teams, contributing to sprint planning, daily standups, and retrospectives.
- Optimized API performance and improved front-end responsiveness, contributing to a better delivery operator experience.

Front-end Developer • LiLab

Jul – Dec 2021

- Designed and implemented the front-end for a medical office digitalization project, replacing paper-based workflows with a modern React interface.
- Built a reusable component library and applied responsive design principles for accessibility across devices.

Freelance Full Stack Dev • SOFI

Jul 2022

- Independently delivered three projects: a marketing landing page, an appointment booking app with calendar integration, and a real-time voting application — all on schedule.

KEY PROJECTS

Student Platform (Numen)

Full-stack app: auth, calendar, chat, notifications, video on demand. Stack: React, Node.js, Express, PostgreSQL.

Delivery Tracker (Ivoy)

Real-time delivery tracking with Google Maps API & Strapi CMS. Geolocation + Google Cloud backend.
