TECH STACK

Languages: TypeScript, JavaScript, Python, Dart

Frontend: React, Next.js, Tailwind

Mobile: Flutter (iOS & Android)

Backend: Node.js, Express, FastAPI, GraphQL (Apollo), REST

Data: PostgreSQL, Prisma, pydantic

AI / LLM: Claude API, Gemini, structured outputs, LLM evals, faster-whisper

Cloud & CI: Google Cloud (Cloud Functions), GitHub Actions

Testing: pytest, hypothesis, Jest, Playwright

Tools: Claude Code, Git, Figma, Agile / Scrum

LANGUAGES

Spanish — Native
English — Professional (B2)
Korean — Basic (studying)

EDUCATION

Assoc. Degree, Software Dev.
Ministry of Education, AR · 2022

Full Stack Web Dev Bootcamp
Henry · 2021 · 700+ hrs

General English B2
AFS, Cardiff, UK · 2019

CERTIFICATIONS

Anthropic · 2026
Claude with the Anthropic API
Claude with Google Vertex AI
Model Context Protocol: Intro & Advanced Topics
AI Fluency: Framework & Foundations

DeepLearning.AI · 2026
Safe and Reliable AI via Guardrails

PROFILE

Full stack and mobile developer with 5+ years shipping production software fully remote, across healthcare, logistics, edtech and finance. Builds modern web applications with React, Next.js and TypeScript, from reusable component libraries to full-stack platforms on Node.js and PostgreSQL. Sole developer of a Python accounting-automation pipeline on Google Cloud (2,500+ tests, Claude and Gemini SDKs) and of Flutter apps live on the App Store and Google Play. Builds LLM-powered applications with Claude Code: LLM-as-judge grading, structured outputs and eval harnesses. Mentored 20+ junior developers; used to working across time zones.

WORK EXPERIENCE

Full Stack Developer · Utomata — *Sep 2023 – Present*

- Sole developer of a Python accounting-automation system that parses bank statements (PDF, CSV, XLSX) from 8+ Mexican banks and reconciles them against expense invoices; deployed as Google Cloud Functions with pydantic, structlog and the Anthropic and Google GenAI SDKs.
- Built a 2,500+ test pytest suite, including property-based tests with hypothesis, running in CI on GitHub Actions.
- Shipped a cross-platform Flutter (Dart) app to the App Store and Google Play.
- Built the company website with Next.js, TypeScript and Tailwind, with measured gains in load performance and search visibility.

Mobile Developer · OpenHelp — *Sep 2023 – Present*

- Built a Flutter app from scratch that gives users access to support services, published on iOS and Android: REST API integration, provider state management, push notifications via APNs/FCM.

Full Stack Dev Mentor · Numen Academy — *Mar 2022 – Dec 2024*

- Designed and built a student management platform for 400+ students: OAuth 2.0 login, interactive calendar, real-time chat, push notifications and on-demand classes (React, Node.js, Express, PostgreSQL).
- Owned the PostgreSQL schema for about 3 years, running migrations against live data as features shipped.
- Mentored 20+ junior developers through weekly sessions and code reviews; several went on to developer jobs.

Full Stack Developer · Ivoy — *Dec 2021 – Jun 2023*

- Built and maintained 3+ responsive web apps with Strapi CMS, Google Cloud and the Google Maps API for real-time delivery tracking; optimized API performance and front-end responsiveness.

Front-end Developer · LiLab — *Jul – Dec 2021*

- Replaced paper-based medical-office workflows with a React interface built on a reusable, accessible component library.

Freelance Full Stack Developer · SOFI — *Jul 2022*

- Delivered a landing page, an appointment booking app with calendar integration and a real-time voting app, all on schedule.

KEY PROJECT

OPIc Simulator · Python, FastAPI, Claude API — *Aug 2026 – Present*

- Browser simulator of the OPIc English speaking exam: records a 15-question oral test, transcribes locally with faster-whisper and grades it against ACTFL descriptors with an LLM-as-judge using structured outputs.
- Claude Haiku rater with a local Ollama fallback behind one adapter; prompt-injection fencing of candidate speech, quote verification, and two eval harnesses for rater benchmarking and calibration. 592 pytest tests; built with Claude Code.
